

cost-effective manner. Combining aura-attuned chromatherapy with harmonious sounds, tissue salts and hydrochromatherapy further reinforces this powerful therapy, resulting in The 49th Vibrational Technique.

I came to realize that few individuals are totally satisfied with the contemporary methods used in the healing process. In my travels I began to sense a degree of hopelessness prevailing in society at large, especially as it related to those in the middle or advanced stages of the aging process. I had a feeling that, metaphorically, many were running on six instead of eight cylinders, without the access or ability to tune themselves up effectively.

I often thought humanity was denied or being cut off from the instruction or repair manuals for dealing with their own bodies because of the way contemporary medicine has been practiced. I wondered whether anyone would or could provide the necessary repairs to this system at the present critical point in time. It is for this reason that The 49th Vibrational Technique came into being, as I had to be assured of the existence of a satisfactory support system to the self-healing process, at least for nondegenerative types of diseases. I have attempted in the pages that follow to encapsulate an encyclopedia of the knowledge I have obtained on color medicine in a condensed and nonanecdotal form. Additional volumes can and will be written, stressing supportive empirical evidence collected and documented by positive results achieved through The 49th Vibrational Technique and other contributing variations of color medicine and natural healing.

Since my initial probing into the alternative or holistic healing process, many of my views have changed — for the better. Many of the same doors will be open to you as you progress through the realms of in-depth understanding of how and under what conditions the human body can best function.

## **COLOR MEDICINE**

### **The Secrets of Color/Vibrational Healing**

*Color Medicine* is a highly effective, inexpensive and easy to administer technique used by alternative healers to restore blocked energy in the body's bioelectric field or health aura. This unique system, known as the 49th Vibrational Technique consists of attuned color frequencies in which energy is processed through color light filters and irradiated into the aura. The technique matches specific organ and body systems needs with corresponding color wavelengths or vibrations, and when fully absorbed by the physical body it strengthens deficient energy or sedates overactive energy in the diseased areas.

*Color Medicine* shows you how to choose the appropriate color or vibration, how to effectively apply the technique and acquire the necessary equipment for this highly powerful, yet completely safe technique for improving health.

See why practitioners are able to alleviate or eliminate over 100 of the most common diseases of mankind in the environment of their own homes, through this comprehensive and entertaining book, one which is on the absolute cutting edge of holistic health care.
