

The Great Experiment: Earth Humanity

Zoosh, Joopah and Osiris Sedona, Arizona, October 13, 1987

oosh speaking. In this day and age your alignment with space (as you understand it) or with beings who are from someplace else (as you like to say) is most constructively involved in your life if you perceive them as actors. If you do perceive them, allow them to be equals—not anybody better or greater than yourself, but simply other actors on the stage of life. If you want them to be all-wise and wonderful, powerful and creative, if you want them to be sweet and gentle, if you want them to be anything, they will be what you want and need them to be in any given moment. Recognize that in your interaction with any individual actor in life, such as yourselves (you are all actors in life), you will experience from that actor or individual just exactly what you need. You might experience challenge; you might experience "so what"; you might experience an emotion that equals "Yech! I can live without him or her!" Or you might feel an attraction, almost as though someone reached into your heart and said, "Hey, you, come here."

You might experience many things. But one thing you must be aware of and alert to at all times: You will experience a desire to be saved, guided or led by someone or something that is on the inside track while you are struggling around on the outside track (to use the athletic term). If you're on the outside track all the time, you're running a longer race than the person on the inside track. You don't have to go too far in

your society to hear the words, "Well, she's got an in" or "He got in because he knew somebody. It's who you know, that's how you get in."

So I am suggesting that in order to see how you fit in, you must see beings from elsewhere as total equals. Do not confuse yourself with the dilemma and obvious conscious confrontation such as, "Zoosh or Charlie" (pick any name) "seems to know some things that I have momentarily forgotten." As you will notice, when the truth resonates within you —a truth that you can feel—then I'm not telling you anything that you don't know. I'm only reminding you of what you already know. If it does not resonate within you, then you can say, "Well, so what! I could have gotten that out of the encyclopedia." It is important for you to have this equal partnership. When you are building a house and putting up a wall that has been formed on the ground, if one side is doing all the pushing, it's hard to raise the wall. You've got to be equal.

Technology Not a Measure of Advancement

Allow for the fact that beings here from other planets may well be more technologically advanced, as you perceive it (though it is not possible to be more advanced technologically, since it is merely the development and completion of an idea), but they might never have integrated emotion into their lives. In the case of some of these so-called "advanced" beings, maybe they couldn't get as far in technology as they would have liked because emotions got in the way. Maybe they decided (in the case of the Zeta Reticuli beings, and they know this) that emotions were causing a lot of disturbance, that emotions weren't efficient and that if they could genetically purify the species, then it would be easier to build bigger and better spaceships.

Many beings from Zeta Reticuli are in your skies all the time. They have been here since the beginning of the creation of the human race as you now experience it. You didn't naturally evolve here. You are the result of an experiment, although not from any inbreeding with them; you are not the result of that. They would like to have what you have, but they don't know what it is. It is important for you to recognize that so-called technological advancement is not a measurement of a so-called

advanced civilization. That idea has to be dropped.

Technology is like anything else. Maybe you want to explore the idea of growing roses and you grow a rose garden. You say, "I'll start out with A and end with Z. I'll grow every rose I've ever heard of until I've completed that cycle." After you've grown the Z rose, you then go to your neighbors, give out announcements, put ads in the papers and say, "I'm now the most technologically advanced rose-grower in the history of the world." This joke is to point out that there is a tendency in the so-called Western world (of which you are a part, or you wouldn't be here) culturally, politically, historically, to look at some countries that do Light Technology to have indoor plumbing (for example) as being a little backward.

Maybe some people find that rubbing urine on the body is purifying. You think to yourself philosophically, "Oh, that's all right if they want to do that." If you were confronted with that in your own yard, then you might say, "That's all right if you want to do that in your yard." Being philosophical is one thing, but the practical experience in front of you is quite another.

What I am suggesting is that it is vital for you to understand that technological experience means nothing. It is the exploration of roses from A to Z. At some point that Zeta Reticuli example - of a civilization that is technologically and spiritually advanced but emotionally dwarfed -discovered that emotions are vital because they are the juice of creativity, not in the sense of technological perfection but because they are the juice, the guts, as it were, of the creative energy. So they are now working to create their species in a way that lasts - because they don't understand love.

Zetas, Watchers of the Experimental Stew

They have been here since the beginning to watch over the experiment here on Earth, the experiment of folding in equal batches of what you now call positivity and negativity, or what I like to call comfort and discomfort. This is the experiment that folds in equal batches and says, "What can we create here? We've got this species of being here that developed on this planet called Yeti or Bigfoot. We see them now and then. Those are the original Earth beings. Sometimes you see them running around a little bit, but not much; they're shy. They live underground, for the most part.

"Folding in this stuff, we've got to have strength. How can we be certain that they'll be strong? Well, they have a pretty hostile environment here, big wild critters running around. So we'll help them to be strong by creating an environment that is safe enough but that they must be able to survive when things get warm. We know they're going to be strong, because the ones that can't run fast enough will be somebody's

dinner. So we're going to bring them along slowly.

"We're going to mix in equal batches of Orion beings, Pleiadian beings, beings from Sirius. We're going to make a little stew here. We're going to bring in the mind of Orion. We're going to bring in the joy and childlike sense of discovery and song of Pleiades. We're going to bring in other things. We're going to bring in many things that can be applied.

"We're going to bring in our friends from Zeta Reticuli, the finest technicians known in the universe, to watch over the experience and tell us how the stew is coming. They are here. They like to serve, they say."

But the great God entity says the real reason they're here to report back to the Network how you're coming along is because they need to discover what they left behind to achieve technological perfection. Oh, Light Technology Pholishing they have an understanding 200689 U.S. 11928-120-1345 is a separate thing. That is why some beings here on this planet have spirituality that is separated. They might go to church on Sunday, but they practice life as they want during the week, you understand.

Nothing exists here without having existed someplace else. The idea of America being the melting pot? Well, I can assure you that that is an outgrowth of the idea of Earth being the melting pot of the genetic experiment to create a powerful race of beings called the human being that which wants to know. That's where Earth is.

Human Curiosity

The human being - that which wants to know. Have you ever met a child who is full of life and isn't curious? The human being wants to know, is born with the desire to know, wants to know everything. When? Now, not tomorrow. It doesn't understand tomorrow, only integration into the now. Spirituality is now, and it intersects with the material plane right here, now. Now is always now, and the material plane is always as it is, moving through its development.

The human race is in its teenage years, in a sense. What do teenagers want to do? They want to get out of the house and explore. Can't wait to get out and join the Navy. "Maybe I'll go join a theater group and travel around. Want to see what's out there in the world, what's across the river, what's on the other side of the big pond." You want to know,

You have been created so that you will want to know. The great adventure in the future is, of course, space exploration, and the tantalizing element is these critters who are flying around in the spaceships. Who are they? Have they got two arms, two heads? How many heads have they got? Two legs? One leg? You want to know.

Curiosity is an emotion that is unknown on Zeta Reticuli. Now, I'm not picking on Zeta Reticuli, just putting them on notice, in a sense. They know this now. They've gradually begun to come around to the idea and knowledge in the last fifty years or so that something is missing

from their civilization - the juice that bonds life.

Plants can be created on the ethereal plane out of thin air, so to speak, but not plants that need water and live in harmony with all elements, not plants that will in time die and gradually become soil in which other plants will grow. In other words, etheric plants are not

cyclic life that feeds other life.

You have come from life cycles of other galaxies [star systems]. However, those galaxies are from your dimension. I can assure you that those galaxies have other dimensions just as Earth has its dimension now. You are like the child's toy that is a ball on a rubber string that you can bounce and snap. You are at a certain point in your destiny, which didn't start here and will not end here. It is necessary for you to grasp that you are here out of your soul's choice, and your soul manifests itself Technology Publishing Light Technology com · 1-800-450-0985 (US) · 1-928-526-1345 isn't created physically out of Earth. Yet nobody here originally developed on Earth, for your souls all owe their origin to other places.

You came here for the Earth experiment to create the Explorer Race ("I want to know") so that you would have a lust for life, so that you would go out into space bringing that lust for life – the desire to get to the top of the mountain – not willing to say "this far and no farther" but to go all the way. You will bring that lust for life back to areas that live interdimensionally (such as Zeta Reticuli) and that need to be reminded energetically why you have something they need – these great and powerful, knowledgeable beings who can build craft that can fly from their galaxy to yours in a couple of hours (most of the distance is traveled in an instant), who travel in spirit light. How can that be?

Emotions, the Fuel of Creation

In their quest to develop the highest spiritual and physical, technological society with a blending of matter and spirit, the Zeta Reticuli forgot that even though emotion can be tricky stuff that can maybe mess up the works now and then, it is the power, the fuel of creation.

It takes a lot of men to build a machine; it takes a lot of them to get the oil out of the ground for fuel. But did they go into the ground and create that oil? No. They got it out, they refined it, they put it into the machine and it runs the machine, but they didn't make the oil. The "oil"

is emotion, heat, pressure -it is many things. It is desire.

It is important for you to recognize that the key to your power lies in the physical manifestation of your emotions while you are aware of spirit and while you have thought included. It is balanced. No one has ever manifested on this planet without spirit, physical body, mind and emotions. You come here with all four to use them all, so that when you become the Explorer Race and go out and meet those funny people who look and act different and who seem to be so technologically and at times spiritually advanced, you can give them something they need. They know this, and that is why they are so interested in your progress.

And there's always this: You manifest here. You have lives on other planets and you understand somewhat (mentally) the idea of all your lives happening at the same time when you take yourself out of the context of time. And you don't necessarily have to have all your lives as an Earth person. Maybe almost everyone here on Earth has a probable future life on Zeta Reticuli – the planet that forgot how to laugh and still does not understand why they should, what's in it for them. Because with laughter goes tears, and tears are oh, so inefficient. It stops everything when you cry. You can't cry comfortably and do your work, not if you get into it all the way and have a good cry. That's inefficient, you see. You can't build taller and better buildings when you're blubbering all over.

Light Technology Publishing nds Light Technology.com • 1-800-450-0985 (US) 18928-520-1345

a desire to live. Your scientists are familiar with the idea of positive and negative ions and so on. They're just now beginning to discover those tiny little particles that they think don't have any charge, but in reality can adapt to any available charge. They are the catalytic energy that brings together the positive and negative ions to form matter, which eventually becomes you and everything else. So in a sense, the energy of those unknown funny little particles is the energy of the desire to live.

"I want to be. I want to be human. I want to be a tree. I want to be a dolphin. How do they live? What do they know? I don't want to just study dolphins, I want to be one. I want to be a human being — what are

they?"

The Equality of Human-ET Interchange

It could be that many of the Zeta Reticuli beings who are studying you in your probable reality ("But Zoosh, this feels physical to me!" – of course, because you are in it; and their reality also feels very physical to them) are in many senses your future selves reaching back to you for help. They help you and you help them equally, this being a world that is positively and negatively charged, where those charges are brought together with the power and energy of the creative force – emotion. It could be that you help each other.

It could be that those future selves are coming back here to recapture what they left behind so that their race does not have to come to an end -for it is now dying, and they know this. They had been locked into the idea that it is because they had not developed strong enough physical bodies. ("If only our bodies can be stronger. How can we create that?") They, like your scientists, have tried to find the meaning of life by looking with higher and higher magnification. They have concluded that the molecular structure that bonds their physical bodies together has become indifferent to the idea of holding the atomic structure together. There is a loosening of the electron field within their bodies, almost as though the elec-LightTechnology.com • 1-800-450-0985 (US) • 1-928-526-1345

based upon them) no longer have a will or desire to live - they do not have your lust for life, joy of discovery, appreciation for the smell of the flowers and your reaction to it. Not just the smell of the flowers -not diagnosing the chemical elements that cause that odor to penetrate your sinus cavities - but your emotional-physical reaction to the smell.

That is why they are here. They know this now. They didn't know this in the beginning. They thought they were performing a service to the Network. ("How can we be of service?") Now they know why they

are here.

It is important for you to understand this because there is a tendency, especially in the Western world, to perceive one way of life as being better than another. It is important to perceive the reality of the socalled space brothers and sisters and space "its." (They're not all brothers and sisters, I can assure you; some of them are its.) They are here also for themselves. It just so happens that what's going on on this planet will allow the resolution of future and past ideas you could call mistakes - not because they were "oops!" but because they were deadend courses of action that could only lead to an ending (such as the exploration of technology without the inclusion of all the portions of

you -spirit, mind, body, emotions).

What is going on, then, is a balanced interchange between you and extraterrestrials. There are many beings here from many different planets and galaxies, because as the Earth experiment evolves it is going to be possible to allow past dead-end experiments to be balanced and moved beyond. Earth is the crux, the precise place where the energy is balanced. It is going to be possible for the race, for example, on Zeta Reticuli (who are so many millions of years in the future that they are really in another dimension from you right now), their species, their race consciousness, to not die out. Even though a large portion of their physical, systemic life is almost pseudomechanical, there is still consciousness. It is not going to be necessary for them to die out because they will allow their bodies to become more biological once they understand that the process of life is constant cyclic action - meaning that which flows through and blesses all that it touches.

Violence, Anger and the Will to Live

That could be said about life. You could say to me, "But Zoosh, what about violence?" And I would reply that there is a reason for experiencing violence on this planet. Why? Well, if you had a desire to learn a particular course of action on the Pleiades, for example, where there isn't a whole lot of violence (how much? almost none), it would take you many lifetimes to find out, maybe nineteen to twenty. Maybe your spirit guides you and says, "Two lives from now it is going to be absolutely necessary for you to understand the idea of the creative force of energy." Light Technology Publishing LightTechnology.com • 1-800-450-0985 (US) • 1-928-526-1345 know whether I'm going to have a complete understanding of that." They reply, "Have I got a place for you, a place where energy can be created and uncreated in a moment, where entire civilizations can be created and uncreated like that [snaps fingers]!"

Your civilization was created just as it says in the Bible. Your biblical tome is an allusion (not illusion) to the way things happened. When your species was created on this planet it was through a larger force. Many of the beings who were involved, especially from the galactic region Sirius, are even now similar to yourselves. So the energy involved in that creative power was designed to create within you a desire to be, to scream for life, saying, "I want to live!" and not meekly let life parade by you. If a neighbor asks, "What?" say, "I WANT TO LIVE!" not "I want to live" [in a tiny voice].

The desire here is to create life in all of its possibilities, in all of its beauty, in all of its ugliness. Because what is ugly to one may be beautiful to another. Maybe some civilizations existing even today consider violence to be beautiful. And now that the world is smaller and you know about them and they know about you, then since you're coming together, maybe you have to throw all of that into a blender, shake it up and reach some kind of understanding so that the drink doesn't poison and kill all of you.

Maybe that's why the communications experience now is changing. People on the other side of the world have said, "Americans are from the devil!"—all Americans, you understand, not this American or that American, but all Americans—and you know this is not so. Even though you might allow that some Americans might be bad, you are still willing to allow, in your very magnanimous attitudes, that some Americans, especially yourselves, are okay. Well, it is the same all over. It is time to get beyond a narrow, limited view of life.

There has been a great desire by your source races to explore this planet. Many excuses have been brought forth: "We will bring our way of life to them. We will improve their lives. We will find things there that will be good for us" and so on. But the real reason was to bring you all together, sit you down at one table (so to speak) and see if you could feed each other as well as feed yourselves. You've done a pretty good job. You haven't finished blowing yourselves up, and it doesn't appear that you will this time. You have certainly risen and fallen here before many times and temporarily finished it. But you can't keep a good race down, as you might like to say.

This preamble is just to remind you that in order to fulfill your purpose on this planet it is absolutely necessary that you allow yourself to be emotional as well as mental, that you be spiritual as well as physical, and that you allow all parts of you to be present with you as Light behavior of this they "then the order to be present with you as Light behavior of this they "then the order to be present with you as

side of the world who thinks that all Americans are bad and should be eliminated obviously doesn't understand how wonderful you are.

Also recognize that it is necessary to allow your emotions when you are angry as well as when you are happy. Otherwise you will not understand the creative power that is behind life here on this planet.

We might hear from a few other beings, someone from Zeta Reticuli, and end up with someone who has some connections here to Earth, talking to you about what you can do for yourselves here on this planet, how you can best align your energy to Earth and how you can be all of you without saying, "All Americans are bad; all emotions are bad." Let it stew around in you. I know when you're being emotional, and I'd like you to do more of it. It is good. Keep it up.

Joopah speaking. My origin is Zeta Reticuli. My friend and advisor Zoosh has spoken to you of our quest for the knowledge of the energy you humans refer to as emotion. We have studied this for some time and have come to realize that in order to experience emotion, we must increase our physical interactions with the human being as a species. We have therefore over the past five or six hundred years had more open communications with the human being as a race. We have at our convenience established communication with many members of your Earth race and have even reached out to some of your governing bodies. It has been difficult to reach out to the governing bodies because they come and go so quickly and have no lasting effect or guidance. They do not, in a sense, represent any form of Earth philosophical approach to life.

So our attempts to speak to Earth beings through the governments have been put away for now. It is more comfortable for us to speak and communicate directly with an Earth being individually. So I will simply ask, do you have any questions about Zeta Reticuli, why we are here and who we might be to you?

What life span do you have?

We live for several hundreds of your years because our bodies are efficiently created to form a perpetuating energy system in its own right. It is unnecessary for us to eat or even partake of liquid, as our physical bodies are nurtured on what is a more genetically evolved machine (almost). Our systems will thereby function smoothly for two to three hundred years, depending upon the form and function in which we participate in this life. If it is our purpose to lead some group, we will Light Technology Publishing. Light Technology com : 1-800-450-085 (US): 1-928-526-1345

live for perhaps three hundred years. If it is our purpose to follow, we will live for perhaps two hundred years.

Are you saying that your bodies do not have any organs?

As you would understand it, they do not have separate organs. They are made up of a physicalized plasmic form of motion. That is the best way 1 can describe it to you. If you were to condense light —and you have done so in the form of the primitive laser —and encapsulate that light into a body, it would live indefinitely. So we tap that condensed light energy and exist upon it for as long as our existence is deemed necessary.

Do you have any kind of sexual intercourse at all?

We do not do so for our own perpetuation of the species, nor do we do so for fun as you might do here. We have that experience only when we are involved in breeding experiments in an attempt to achieve a level of physicality to adapt our species to a more physical environment.

Right now it is necessary for us to create a physical shield of energy around us when we have contact with you. This shield creates a severe limit in our communications, for what we wish to understand from you is something that is expressed energetically —emotion. Even though it has physical and mental attributes, it is primarily an energy. Yet because we are affected so severely by any outburst from you of what you call discomfort, we find it necessary to create an energetic field stimulated by a mechanical device around our physical bodies. That shield does not allow us to truly feel your communication but rather to simply hear it, which is not sufficient. In order to have any true contact with physical beings, we must create a hybridization of our physical bodies that can interact with you on a more physical level without the need to create this plasmic shield.

As you beings communicate with one another, your primary means of communication is through what you feel from another person rather than what you hear. Then your mind interacts on the level of thought and seems to give you permission to like or not like something. But primarily the physical reaction is stimulated by your emotional-energy interaction on the auric level. We do not allow that interaction with our species because were we to be lanced, so to speak, with some energy of discomfort, it would cause immediate death or isolation from the others of our species. We do not have any system built into our now physical bodies that will protect us from any incompatible energy.

Then how can you thoroughly study our emotions?

Need for Zeta Reticuli Hybrids

We cannot. This is why it is necessary for us to create a form of body into which we can manifest our consciousness. Then we can have a Lighter-echiology desistant significant who become another than the control of t

involved in the experiment of hybridizing your bodies and our bodies for some time with a group of volunteers.

Sometimes the volunteers on your planet do not remember that they volunteered for this, but all who are working with us have given us their conscious or unconscious permission at the soul level. Sometimes people will not remember that permission was given, because they are in their conscious—or separated—state on your world. When you are experiencing your body consciously you are somewhat separated from your all-knowing knowledge, and that knowledge will then not be present to remind you that you have given your permission. So it is necessary for us to create a different form of body so that we can interact with you on a more compatible level.

How many hybrids are now on Earth?

They are not on Earth. They live with us. If the scientist wants to study what is being created, it is rather difficult to study what is being created if that "what" is interacting with beings that are unlike itself. Therefore they live with us so that we can study them and so that they can, by living their lives, demonstrate to us what can be.

Are they born on your ships?

They are born on the ships or on our planet.

Do you know of and/or interact with the angel hierarchy?

We are aware of your understanding of this energetic level to which you ascribe good and evil. Some people consider that some angels are not good and some are good. This is a current separation.

Are you aware of the infinity of the soul?

All souls are infinite.

Are you aware of other dimensions that are in contact with emotion?

We are aware, but mental awareness is not sufficient. We are not experientially aware.

In Earth terms what would your existence, your vibration, be dimensionally - a fifthor sixth-dimensional level?

Eighth. You do not really understand that frequency is not an outward hierarchy, that frequency simply is. And of course there is also pulse. Pulse and frequency are not the same. Pulse is much closer to what you refer to as hierarchy. Frequency is that which exists within a pulse.

Contact with the U.S. Government

Did the United States government come into contact with your race through experiments 44 years ago?

Yes. And before that, in the 1890s, there was contact.

Did the experiments with what you call primitive radar invisibility establish contact

Light feethfology Publishing our Scientifechnology.com • 1-800-450-0985 (US) • 1-928-526-1345

As I said, the original contact was in the 1890s, but as far as what is known to you, there was some contact in the forties.

Have you shared technology with the United States government?

To some extent, as is often the case when even you might go to some other culture and bring along a gift or item that you feel demonstrates something friendly.

Is it propulsion you speak of?

Not so much propulsion as the *method* of traveling. There was some explanation of how ions can move through space and time without loss—no drainage. Atomic theory has been around for a time. There is an idea originally in atomic theory of the wasting away or dying off of energy [entropy] within the atomic cycle. We explained that this was unnecessary.

How do you feel about love?

You are asking me to be something I am not. You are asking, How do you feel? Understand that if I could tell you how I felt, I would not be sitting here talking.

Why not?

Understand clearly that I am here to learn how to feel emotionally.

Are you among those beings who take up contactees to examine their bodies, or is that some other race?

We are amongst those.

Are you still doing this?

Yes. We have never taken anyone without their permission, ever. And they rarely remember what we speak about.

Apparently they remember pain and suffering.

We do not fully understand pain and suffering; this is something we are learning. It has been explained to us by those who have greater knowledge than us on a practical level what this pain and suffering is. And we are trying to understand by creating a hybridization of our species so that we will have a cousin species, you might say. Right now there is no species about which we can say, "Ah yes, they are like Uncle Charlie," you understand. We do not have a direct correlation of species to which we can have direct communication that we can understand. So there is a communications gap.

Are you in communication with the Altekkians of the Pleiadian system?

What's in a name? We are in communication with all. We are not disconnected from spirit. The idea of love is something that we understand on a universal level. We do not understand very much the idea of hate nor do we understand very much the idea of individualized love. Let me clarify that. We are aware of all beings whose goal is to achieve Lightechighest property of all species you were are one to much (in) contacts with the

beings who are simply involved in troublemaking, to use your term.

Zeta Reproduction and Race Consciousness

Are you androgynous beings?

Yes.

Do you reproduce by thought?

No. We have technical means.

Are you speaking of cloning?

Yes, as you would understand it. It is not so much genetic cloning as a form of cloning that is like pressurizing carbon to make a diamond, which becomes this energetic substance of greater mass than the original substance. So it is more a technological and linear thought pattern. Well, as we have parts of our beingness on other planets and other systems of worlds, you must also.

Indeed.

Then through one or the other wouldn't you be able to experience emotion and . . .

Understand that our consciousness is more of a race consciousness. We do not have what you experience as individual consciousness. What one of us knows, we all know simultaneously because of the nature of our species, whereas in your species even though unconsciously you are aware of all things, on the conscious level one person might know one thing and another not. We do not have that.

So it's kind of redundant to have individualization.

If we were all together on the same planet, yes, but we are throughout the universe performing service as we can.

Do you see this race bringing more of the unconscious material into consciousness in this time period?

Oh, yes. That is part of why we have always been here, to perceive the experiment: Earth Human Being.

The Process of Earth Human Being

Can you tell us more about this process?

Well, of course, the idea is to bring up that which is not known and create an alignment through the use of that which is experienced all the time. Since you experience your mind, your body and your emotions all the time, then with the guiding light of spirit, what will be brought up is all that you have never found a logical placement for or never put in place emotionally or never understood how to deal with physically or never integrated spiritually. When you bring up your unconscious (in spiritual terms, your soul self) and allow it to be your day-to-day self, you necessarily bring up the residual stuff that you have placed under your conscious mind (subconscious) to bridge that gap. We are aware

the clear path of the unconscious or soul self might be consciously

tapped during your conscious, day-to-day life.

Very often these days you will have these emotional outbursts. We are round about in the skies, and especially with those we feel a connection to, we will tap in to your physical self. Sometimes we will be present in the form of tones. You might hear us toning in, tuning the crystal frequency within your pulse. And we will then extrapolate as much as we can from the way your physical body reacts in an emotional cycle so we can understand the effect of your emotions on your physical self.

Do the Zetas have the ability to channel as do human beings channeling interdimensional contacts?

It is unnecessary for us to have a separation to do that. We can utilize a form of communication device or simply be involved in a group meditation that we do.

We do things in groups. We can be involved in a group meditation to achieve a quicker pulse within our current bodies and have that pulse gradually merge into our bodies, thus receiving all knowledge in that moment that we need to know. We do not need to know everything everywhere. We will have only that knowledge we need to know in connection with our evolution. So we will utilize that.

We also have the ability to tie in to your soul bodies through the use of a device, a machine to create a greater communication. We create that knowingness in your thought at the subconscious and unconscious level so that you will ofttimes have, when you meet us, a sense of familiarity even though you might be frightened at our appearance. You will sense a vague familiarity because you will, at the unconscious level and sometimes at the subconscious level, remember who we are from the future or from the past in accordance with other lives you have lived or will live. That knowledge can be tapped unconsciously, so we simply reach in and tap that energy of your future or past self and allow that energy to be reflected in us so that you can see us as something other than some monster, some strange-looking person.

We then allow you to experience our race consciousness in that moment, and there will usually be less fear. We notice that less fear is felt toward us when we share our soul selves with you. In that moment when we allow that soul energy to be within you as we probe your unconscious, we also allow our race spirit to be within you so that you can see the familiar in us as well as the dissimilar. This allows a greater

sense of communication and peace.

Are we being probed right now?

It is possible, yes. We usually do this through the use of a higher-pulse crystal that is involved in your pineal and sometimes one involved with the hypothalamus. We key into your brain-wave pattern in order to understand how your brain waves receive emotions. We have yet to Light Technology Publishing Light Technology.com · 1-800-450-0985 (US) · 1-928-526-1345

achieve a complete understanding of how your emotions speak through your physical body because of our difficulty in communicating physically. But that will come.

There's no lasting positive or negative effects from this?

None at all, because you have given permission on the soul level to be born with the seed crystal within your physical self that will act as a tuning fork to allow us to get in touch with you. That is why sometimes when we are around and need to be directly connected to your emotional self through your physical self, as extrapolated through your brain-wave pattern, you will sometimes hear a tone. The crystal functions as a tuning fork to achieve communication from our pulse to your pulse.

Is a good timing coming up for a worldwide media release that will key in a more pervasive consciousness?

Not yet. That would be interference if we were to create an externalized vision.

I mean from someone here on this planet. There are many people who are working on this right now.

It will be necessary for you all to achieve total and complete harmony individually, to recognize your harmony on a race level. When you are willing to see yourself and everyone on this planet as Earth citizens (not when you have achieved the *total* knowledge and feeling of it) and understand that you have a specific Earth race consciousness, then it will be easier for us to assist in the magic moments that create breakthroughs. Right now it is necessary for us to stand back and let your chips fall where they may.

Do you have an animal kingdom?

Not as you know it.

Have you in the past or at present contacted any members of the hierarchy of Earth to cooperate in what's going on, like Jesus Sananda?

Understand that these beings exist as energy in every one of you. We to have Light Technology Publishing Light Technology.com · 1-800-450-0985 (US) · 1-928-526-1345

disconnection. Anything that has ever existed on this planet exists within every one of you, because this planet and all that is on it, all that is around it, all that is near it, all that is inside it, is made up of a single-cell organism called Earth. And you are a portion of Earth. So it is unnecessary for us to speak to some externalized idea of entity when all of you entities are colored with this Earth-entity ray.

You said that sometimes on a soul level we allow ourselves to be familiar with you. Are our souls on the same vibration? Are they compatible when they meet?

There is a similarity at the unconscious soul level. Some will recognize, as I have stated, a past or future life. Some have never nor will ever manifest as one of us, so there is less likelihood of our communicating with them at any level. When a cellular memory of the future, the past or even perhaps the present awakens in someone, we can have a degree of soul communion in our conversations.

When you said that you neither smile nor experience humor, is that because humor passes through the emotional body?

Yes. We are learning to understand the value of humor. You know, it isn't as though these emotions were shut in the closet years ago. It is as though in truth they were shut in the closet dimensions ago. And dimensional shifts take millions or billions of years, depending upon what is comfortable to you. But each dimension is unique. We have made dimensional shifts since we parted from our emotions. When speaking through a channel, I can also access some of their energy, so I am learning even now as I do this.

Perhaps more Zetas might experience the channeling process to do some quick learning?

Yes, because it allows us to experience the idea of emotion—not completely, but a taste, you might say. We are still technologically protected by a device that does not allow total immersion in your energy, but a degree of trust builds up between the channel and the being channeled that will in time allow a greater exchange. Many of our species are willing to speak this way through those who are willing to allow it. But it will take time, your Earth time, to establish a sufficient exchange of energies for trust to be there.

Some of you, however, have had ongoing contacts with members of our species since you were small children. Those might find it be easier to channel one of us. Also, one who is particularly active mentally and who finds great comfort in mentality might feel a greater sense of comfort in experiencing the Zeta being, since our primary focus has been mentality and the physical creations possible from mentality.

I once briefly channeled a being named Lela. I never did know where he was from. He had a very alien feeling. Is that one of yours?

Light Technology Publishing Light Technology.com • 1-800-450-0985 (US) • 1-928-526-1345

sound. That sound is somewhat rare for a continuum name. That would be more of a devic sound; that specific case was the deva of another galaxy.

What galaxy?

One difficult to pronounce, Tck-ahkt-[click]-sung -not one that falls trippingly from your tongue.

How much individuality do you have in your appearance, since it is a cloning process?

There is very little individuality that is perceived, except that some of us are six to eight inches taller than others. Certain beings living within the Zeta Reticuli influence might have bodies that look a little different. Perhaps their heads are a little smaller than ours. Perhaps they have almost humanic forms of bodies. When I say "living within the Zeta Reticuli influence," I am referring to the groups of planets that have been interchanging with us for many, many eons (for lack of a better term), and these beings have allowed a certain amount of hybridization of species. In those cases you might see more of what you would refer to as individuality even in garment.

Do you sleep?

Not as you understand it. We have a form of meditation, as you might call it, or a centeredness within the race consciousness for some moments during a 24-hour period, which we do not consider a day.

Do you have particular work that you personally do?

It is part of my job to oversee a certain group of human beings in their development, and from time to time check on their species' evolution as well as guide them toward greater connection to their soul life. It is not that the Zeta being is not a soul-like being; it is that we have chosen to express our soul-like beings on a more unified mass level. So I encourage some of my charges, so to speak, to be more of a unifying energy.

Is the Chinese race or the races that seem to manifest as a group soul or consciousness part of your group expression?

The Chinese race, which has really evolved from the Mongolian race, owes its heritage to those people who live inside the planet and not so much to those who come from afar. There are many races and individuals who live inside your planet. There is a group variously referred to as the Founders, the Speakers or the Tellers who live inside your planet. It is these beings who are involved, who have been involved and who will be involved in the racial structure or outer appearance of the possible physical manifestation of the human being on this planet. The Founders are also the guiding light of energy and God light that help's connect your race to races from other planets.

Do you have children or your planet or do you manifest as an adult.
Light Technology Publishing LightTechnology.com • 1-800-450-0985 (US) • 1-928-526-1345

We have not found it necessary in the past to have children (as you understand it) because we can create a body in its perfected or eventual form (as we would refer to it). However, we are experimenting with the idea of children; that has much to do with your race.

But you would create them in the same way, as a cloning process?

No. The children we are now involved in creating are being created biologically, although there is some aspect of mechanical experimentation, because we are attempting to duplicate the highest possible expression of our race culture within a seedling person.

Your name reminds me of the name Hoova, which is an entity who communicated with Andrija Puharich. Is there any relationship? Do you know who this being is? It was supposed to be some kind of a mechanical or computer-type being holding the consciousness of an ancient being or group.

That being is more clearly associated with the Earth energy sometimes referred to as Jehovah.

That has to do with the Hebrew race? As I recall, Hoova had told Puharich that it was more or less like our present computer.

In the sense of being an entity that exists in data, this is so. Jehovah was at one time an encapsulated person from the Sirius galaxy and came here in a large ship. But that's another story. This being, as much as I can tell, is a form of the data register Jehovah. Jehovah is not a god, but a person. Jehovah, you understand, is no longer in a physical body and is now an energy that transmits a different vibration.

Cattle Mutilations: Sirian-Gifted Instruments Used by Humans Concerning the thousands of cattle mutilations that have been going on during the past five or so years: the incisions removing the organs are far beyond human technology.

It is not. It is from this planet.

Who? Beings on the surface of the planet?

It is from this planet. One of the forms of communication —a toy, as it were —was given, unfortunately, to a government as a tool to be used for medical purposes. It had been deemed by races who visited here that your surgical implements were causing damage to the physical body and that your surgeons (and also patients) would like the alteration or removal of organs from time to time. This form of surgery could be done much more efficiently and without damaging the physical body if one could make a cleavage along molecular structures rather than on the organ itself. Therefore this implement was given to a certain government on this planet. However, those implements fell into the hands of those who would use them to extract certain organs, from which certain toxins are created.

Couldn't they do that more easily in a less obvious and less strange way?

Light Technology Publishing LightTechnology.com • 1-800-450-0985 (US) • 1-928-526-1345

What is the advantage?

The advantage is to create a sense of invasion as well as a sense of disempowerment. If one believes that there is some great power swooping down from above to damage creatures as well as some individuals, then there is great fear.

Can you say what government?

I will say simply that the original tool was handed down in innocence by some beings from the Sirius system, and that there is a particular government using a particular form of transportation that is an idea of a pilotless craft, a vehicle that moves soundlessly. All UFOs are not from out there; there are a few who are here. Fortunately, those vehicles cannot go beyond your atmosphere.

Since there are so many in this country, my guess is that if it did not originate with this government, it certainly is by now part of their tools. The only motive that is apparent for generating such fear would be that people would ask for a more totalitarian system.

People have sought for some time now to escape the responsibilities of freedom. That will be my cryptic answer. It is not my intent to make anybody out to be the bad guy, nor is it really my intent to point skyward for what are earthly pursuits.

If some governments had not imposed their will upon individuals, this country would not have had its special beginnings. Thus what seems negative produced something quite positive. My question does not arise from trying to point out the bad guys but to understand what new forces of tension between positive and negative can produce a new insight, a new consciousness. It looks to me as though there is a large number of people wanting the freedom of peace now. Does it look that way to you?

What is peace?

A new relationship between human beings, one without a need for superiority and control - harmony.

Thank you. It is harmony. Since on this planet there exists the potential for clashes and violence and communication that goes beyond comfort, it is possible to have discomfort involved in this cycle of harmony. So one might have, in a sense, disharmony and harmony. One might also have discomfort and comfort. And yet since the energy of Earth at this time is involved in polarities, it is still possible to say that the system is balanced by disharmony.

When you disincorporate, what happens to you?

We understand that we will rejoin our total soul entity in the oneness that you refer to as God and that we refer to simply as life everlasting.

Then you don't continue to reincarnate back onto your planet?

We could, but we do not usually do so. It is our desire to experience as much as possible. The equality of life between us, on a rather nebulous level of what's going on, is that we do not remember beyond our race consciousness memory. We do not remember previous lives. Light Technology Publishing

Light Technology Publishing

We can access them, but we do not consciously remember them all the time.

Can you choose to incarnate into planet Earth to experience what you did not experience before?

Indeed. It is now our intent, however, to allow our race consciousness as a unit to be filled with the desire to expand physically as well as what we have experienced mentally and spiritually. We would like to create a form of life on levels we have not yet pursued. So it is our intent to experiment with different forms of bodies and cultures to see if it is possible to experience more "lust for life" (as brother Zoosh says) as a Zeta being.

Very well. Osiris speaking now. If you have any questions of a more personal nature, perhaps about the subject matter tonight or anything else, you may center into the energy of those questions. You may ask the questions with the energy and emotion that you might feel when receiving the desired knowledge.

I have a great fear of nonphysical beings coming around me at night when I'm sleeping. How can I protect myself?

The reason you sometimes wake up, feel anxious about going to sleep or wake up startled and then become a little frightened is because it is difficult for you to understand that your physical body has internalized some emotional discomforts and created a feeling of nervousness that leads to anticipating that discomfort. There are a number of things you can do.

First, I suggest that you tone for yourself before you go to sleep. Vocalize up and down and feel the location of that tone in your physical self. Experiment to find the tone that is most comfortable for you. It is unnecessary to say anything; just find the most comfortable tone and record up to 40 or 45 minutes of that tone. If you can, go to sleep with that sound. You may tone

along with the recording or simply listen to it.

For any individual the most comfortable tone will be attuned to the pitch that equalizes the balance of your soul's energy within your physical body. You will find through experiment that this tone will help you. It is necessary to soothe your physical body because those nerves are creating within you a heightened awareness that makes it difficult for your personality to depart on its mission.

Second, express, or discharge, the unaddressed emotional energy that is Lighthenhausenalized his then plans to all the plans of the pla

Emotion does not consider that saying words is an expression; the physical body must move as a direct form of communication with the emotional body. When that takes place, then the emotional body and physical body will feel as though the energy is being addressed. When there is that addressing, it will be easier to have the sleep time. And it will be easier to allow the devic energy of Earth to be present.

Earth Devic Energy

A new energy wishes to speak through you that is more closely attuned to the Earth devic energy. Since all energies of the Earth are colored by the energies that have passed by there, the emotional and then physicalized residuals of those emotions within your physical body will often demand to be heard before you begin to channel the devic Earth energy. Which is, as I stated, involved in paradoxes and comforts and discomforts.

You can choose to channel or receive the energy of Earth spirit. It can be valuable in time to channel the devic Earth, the spirit of Earth. Earth has devas for each of the plant and animal kingdoms and so on, as well as some forms of devas for minerals and metals, those that occur naturally and other forms of existence. Yet there is a universal devic energy. It can be valuable for you to attune yourself to the blue-light universal devic Earth energy and be aware of the color and tonation of blue.

If you are willing, I will act as a link and you can receive the Earth devic energy through the bottoms of your feet. If you will, aim your feet toward me for a moment. The rest of you can experience as much of

this as you like. [Long pause for this energy transmission.]

Let yourself be not so much the pillar of the community, but when you are in those alone times, when no one can see you, allow yourself to simply be silly and childish. If you allow a few temper tantrums, you will find that the physical body will feel as though you are willing to allow it to be what it is without judgment. The sadness you feel will gradually fall away as soon as you allow the tears. It will not be easy, but once they begin it will help the process. You do not justify why you are sad, you simply understand that it is present. Realize that to allow the material manifestation of what you want, it is necessary to be more materially and emotionally present on Earth. Material manifestation is an act of materiality, not an act of spirituality. So simply allow, be more emotional. It will help.

When you manifest on this planet you often bring with you a desire as a baby to be spirit in flesh, in form. It takes time for you—many times, many lives—to understand that spirit must use the forms of expression that are here, as well as the etheric moment in which all can be manifested. This is an expansion of knowledge as well as an expan-

sion of the practice of knowledge.
